

GEVPT-xx-P & GEVP-xx-P

Description

Industrial, high-flex Gig E cables are designed to interface Gig E and Gig E Vision cameras directly to a computer, eliminating the need for frame grabbers.

GEVPT is the solution for brutal applications that require more than the standard CAT 5 cables can offer. Our unique over-mold design provides increased strain relief. It is offered with or without thumbscrews. The thumbscrew locking feature ensures that the interface will remain secure despite motion and vibration.

The high-flex cable is capable of surpassing 2 million flex cycles. The durable TPE jacket provides additional protection from elements such as water, oil, and abrasion.

Features

Over-molded Strain Relief

Thumbscrew Locking

High-Flex Cable

Robust TPE Jacket

Double Shielded

RoHS Compliant

Main Product Specifications

Cable:

Conductors:	(4) 24AWG Twisted Pairs	Impedance:	100 Ohms
Overall Shield:	TC Braid Foil Tape	Jacket Material:	Thermoplastic Elastomer
		Overall Diameter:	.245"
