

IF-CLCP-XX-P

Description

Designed specifically for cable carrier systems these High Flex cable assemblies provide the ultimate in dependability, electrical and mechanical performance through millions of flexes.

Available as standard products or in custom configurations.

Features

High Flex cable designed to surpass 5 million flexes

50 millimeter bend radius

Electrical reliability through constant mechanical stress

Overmolded interface

Low particulation

Unique Quad construction

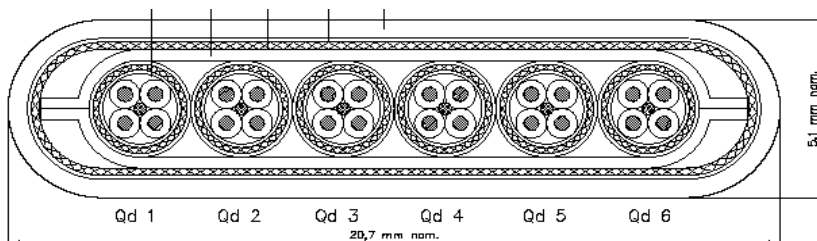

Used in clean room applications

Main Product Specifications

Connectors: 3M MDR 26 Position

Cable: Quad Construction

Jacket:

Material: Compound of ePTFE
UL Style 21090
Flame Retardant
Color: White

RoHS Status: Compliant
