

Intercon 1 Releases Cable Product Catalogs

WAYZATA, Minn.--(BUSINESS WIRE)--June 11, 2007--The Intercon 1 division of Nortech Systems, Inc. (Nasdaq:NSYS), a major global supplier of Machine Vision analog and digital video cables and assemblies, based in the United States releases two new product catalogs.

The new catalogs, *Precision Cable Assemblies* and *Precision Bulk Assemblies*, feature Intercon's full line of precision cables and cable assemblies for the Machine Vision industry. Included in the 43-page Precision Cable Assembly catalog are Intercon's industrialized Analog, Camera Link, Mini Camera Link, Gig E, IEEE 1394, UBS 2.0, and remote head cables. The 52-page Precision Bulk Assemblies catalog includes Intercon's industrial multi-conductor, coaxial, composite, digital and Infini Flex family of cables. Organized by product category, the catalogs feature a one-page outline for each product including a photo, outline, and main product specifications as well as ordering information for each cable and cable assembly.

Intercon 1 also offers custom cable capabilities for a wide variety of industries and applications. In-house R&D allows Intercon 1 to identify the best solution for unique and demanding high-flex applications.

In addition to custom assemblies, Intercon 1 offers custom bulk cables incorporating ruggedized jacket materials, various shielding options and customized conductor counts and gauges.

The new catalogs replace the existing 28-page *Precision Bulk Cable and Assemblies* catalog and offer an expanded selection of new and existing ruggedized high-flex cable assemblies and bulk cables.

For further information and a network of global distributors available to service your needs please visit <http://www.intercon-1.com>.
