Nortech Systems to Exhibit at MD&M Minneapolis, Booth #458

MINNEAPOLIS - September 24, 2008 – Nortech Systems Incorporated (NASDAQ: NSYS) will display its electronics manufacturing services (EMS) capabilities as an exhibitor at the MD&M (Medical Device & Manufacturing) Trade Show at the Minneapolis Convention Center, October 22-23, 2008, in booth #458.

Nortech Systems' personnel attending this show will include engineering experts who can respond to individual technical questions. A variety of product samples will also be available in order to showcase the company's manufacturing and service capabilities.

Nortech Systems recently achieved ISO 13485 quality certification. This certification allows Nortech to further demonstrate its ability to provide products and related services to the medical industry that consistently meet customer and regulatory requirements. All Nortech facilities are certified to ISO 9001:2001 standards and the company also employs an enterprise-wide lean manufacturing initiative utilizing tools such as kaizen, Six Sigma, rapid action, Balanced Scorecard and 5S.

Nortech Systems is a full-service EMS provider of wire and cable assemblies, printed circuit board assemblies and diagnostic repair and integration services including higher-level assemblies and box builds.

With a range of specialized, high-tech facilities in Iowa, Minnesota, Wisconsin and Mexico, Nortech Systems offers customized design, manufacture, testing and repair of our solutions along with complete supply chain management expertise.

Fortune Small Business magazine recently ranked Nortech Systems on its list of "America's 100 Fastest-Growing Small Public Companies."
