### **Intercon 1 recognized by CL committee as source for Camera Link Cables**

**Baxter, Minnesota** — The *Intercon 1* division of Nortech Systems, Inc. (Nasdaq: NSYS) recently received recognition as a source for Camera Link cable products by the Camera Link Committee. As a member company in the AIA (Automated Imaging Association) *Intercon 1* has committed to the member companies to maintain minimum levels of bulk cable (*Intercon 1 InterFlex* 89878-11P) and connectors to service all development and sales needs within a short lead time.

*Intercon 1* further announced its commitment to support the standard by offering test product and cable design assistance to manufacturer members producing or developing Camera Link product. Assembled-Hood cable product is immediately available. Molded products will be available prior to November 2001 at no additional cost.

The *Intercon 1 InterFlex* 89878-11P cable meets all stringent Camera Link signal transmission parameters and is designed as a high-flex cable with industrial-use flex cycles exceeding one million. Details on assemblies and ordering information is available through *Intercon 1* Sales and Customer Service at 800-237-9576 or [www.nortechsys.com/intercon](http://www.nortechsys.com/intercon).
