

Dear Devicix Friends and Customers,

Since Nortech Systems acquired Devicix in 2015, we have been striving to integrate best practices amongst our medical design and manufacturing groups. As many of you are aware, Devicix had operated as its own brand under the ownership of Nortech Systems Inc. We'd like to inform you that the Devicix name and brand will now officially be retired. Going forward, all Devicix activities will be offered as part of our medical technology segment, known as Nortech Medical Solutions.

This change represents the full integration of our medical design and medical manufacturing businesses. Nortech Medical Solutions is proud to offer end-to-end capabilities that lead medical technologies through design, development, manufacturing, and post launch support. We pride ourselves on our strength in accelerating time to market with innovative solutions, while remaining responsive and flexible to meet the exact needs of each technology and customer. By fully integrating our medical design and manufacturing groups, we've strengthened our ability to accelerate, innovate, and support complex medical technologies.

Below is a listing of some of our key services and expertise:

Design & Product Development Services

- Ideation & Research
- Concept & Prototype Development
- Planning & Architecture
- Design and Development
- Test and Optimization

Design Transfer & New Product Introduction Services

- Product Transfers
- New Product Introduction
- Design for Manufacturability
- Process Development
- Test System Development
- IQ/OQ/PQ
- Supply Chain Development
- Device Master Record (DMR) Development
- Pilot and Qualification Builds

Manufacturing Services

- Global Full Scale Production
- Supply Chain Management
- Productivity and Cost Improvements
- Interconnects
- Printed Circuit Board Assemblies
- System Builds - Final Assembly and Test
- Repair and Service
- Lifecycle Management
- Class 7 Clean Room

Applications & Expertise

- Device and System Design and Manufacturing
 - ISO 13485 Compliance
 - IEC 62304 Medical Device Software
 - IEC 60601 Medical Electrical Equipment
 - IEC 62366 Usability Engineering
 - Class I, II, and III US FDA products
-
- Imaging and Diagnostic Systems
 - High Speed Data Solutions
 - Neurostimulation
 - Cardiac Rhythm Management
 - Material and Fluid Delivery
 - Minimally Invasive Surgical Devices
 - Connected Devices and IoT
 - Class 7 Clean Room
 - Test System Development and Validation
-
- Industrial Design
 - Human Factors and Usability Engineering
 - Biomedical Engineering
 - Mechanical Engineering
 - Electrical Engineering
 - Software and Firmware Engineering
 - Systems Engineering
 - Program Management
 - Manufacturing Engineering

If you have any questions on this new and exciting development, please feel free to contact me at jling@nortechsys.com.

Best Regards,

A handwritten signature in blue ink that reads "Jeremy Ling". The signature is written in a cursive, flowing style.
