Not Applicable
(Former name or former address, if changed from last report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, And provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

Section 1 – Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Nortech Systems Incorporated (the “Company”) has prepared and filed a Conflict Minerals Report for the reporting period January 1, 2017 to December 31, 2017, which is provided as an Exhibit hereto and is publicly available at <http://www.nortechsys.com/wp-content/uploads/Conflict-Minerals-Disclosure.pdf>.

Item 1.02 Exhibit

The Company has filed, as Exhibit 1.01 to this Specialized Disclosure Report on Form SD, a Conflict Minerals Report.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 18, 2018

Nortech Systems Incorporated
(Registrant)

Constance Beck, Chief Financial Officer

Conflict Minerals Report May 9, 2018

Nortech is a full-service electronics manufacturing (EMS) provider of wire and cable assemblies, printed circuit boards assemblies and higher-level complete box build assemblies for a wide range of industries. Metallic forms of tin, tantalum, tungsten and gold ("Conflict Minerals") are present in some of the products, components and materials we purchase and are necessary to the functionality of many of the products we manufacture. We do not buy any ores directly, nor do we directly purchase these processed metals in their raw form.

Nortech's corporate policy regarding Conflict Minerals and disclosure regarding whether any Conflict Minerals necessary to the functionality or production of a product originated in Covered Countries is made public on our website at: <http://www.nortechsys.com/about-nortech/quality-regulatory-compliance/conflict-minerals-policy/>

Design of Due Diligence Framework

Our due diligence procedures are in compliance with the Organization for Economic Co-operation and Development (OECD) *Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (Third Edition)* and its supplements.

Nortech's policy regarding Conflict Minerals was communicated to employees internally and to suppliers externally via e-mail and posted to our website.

Our cross functional conflict minerals team was established to carry out the necessary due diligence and reporting requirements. The team currently includes the following roles:

Team Members: Document Specialist
 Global Supplier Quality Manager

Executive Sponsors: President & CEO
 Chief Financial Officer

Due Diligence Measures Performed

Our RCOI (reasonable country of origin inquiry) and due diligence procedures include the following:

- Due to the size of the Nortech's sourcing functions, we focused on our largest suppliers that provide components and materials directly incorporated into our final products, ranked by the amount the Company spends with each such supplier, and the suppliers that had the highest probability of supplying us with products or components containing Conflict Minerals (e.g. electronics).
- We surveyed relevant suppliers representing 80% of our total company supplier spend on components and materials directly incorporated into our final products.
- Relevant suppliers were evaluated to identify whether the products, materials or components supplied to Nortech contain Conflict Minerals.

- Data was collected directly from suppliers using the Conflict Minerals Reporting Template developed by the Responsible Minerals Initiative (RMI) formerly known as CFSI.
- Supplier declarations were reviewed for completeness, accuracy and conformance to Nortech requirements.
- An escalation process was initiated with relevant suppliers who were non responsive after the initial contact was made, or whose initial response was incomplete, unclear or nonconforming.

Analysis of Supplier Survey Responses

- We were unable to confirm through our RCOI that Conflict Minerals contained in our products did not originate from the Covered Countries or were from recycled/scrap materials. Therefore we conducted due diligence on the processing facilities identified by our suppliers and prepared this Conflict Minerals Report.
- Conflict minerals information from some suppliers was presented to Nortech at a "company-level" rather than a Nortech product-specific response. As a result, it is likely that our lists of smelters, refiners and countries of origin (discussed below) include sources that are actually not in our supply chain.

Due Diligence Results

- Suppliers that responded to our survey provided lists of smelters and refiners on which we conducted due diligence.
- Our due diligence process included comparing the supplier-provided names of smelters/refiners against lists of audited and verified smelters and refiners from CFSI, LBMA, RJC, TI-CMC and the US Department of Commerce. The lists of smelters and refiners are included as Table 1.
- Certain suppliers identified Kaloti Precious Metals, Sudan Gold Refinery, Tony Goetz NV, Universal Precious Metals Refining Zambia, and African Gold Refinery as sources of gold in their supply chains. These refineries are not audited by the CFSI and public information indicates the possibility that these are high-risk facilities. Because the conflict minerals information from these suppliers was presented to Nortech as "company-level" responses rather than Nortech product-specific responses, it is uncertain if these facilities are actually in our supply chain. As part of our due diligence process, Nortech implemented our risk mitigation plan for the subject suppliers, engaging them to conduct additional research on whether these facilities are, in reality, present in our supply chain. At this time, those suppliers have not completed their investigation. If we determine that material sourced from these facilities is present in Nortech's supply chain, we will work with our suppliers to explore alternatives.
- Country of origin information was obtained where reasonably available to Nortech and is presented as Table 2.

CMRT Reporting to our customers.

- Nortech issues a standard response using the EICC CMRT.

Third Party Audits of Processing Facilities

- Nortech does not conduct audits of smelters or refiners. We support the Responsible Mineral Initiative's Conflict Free Smelter program through our corporate policy and procurement requirements by encouraging suppliers to source from audited facilities.

Annual Reporting

- In accordance with the OECD Guidance and the Rule, this report is available on our website: www.nortechsys.com

Declaration

- Based on our due diligence results, Nortech has determined that our products are 'DRC Conflict Undeterminable'.

Independent Private Sector Audit

- Not required for reporting year 2017.

Limitations

Conflict Minerals sourcing and traceability information is limited at this time. Moreover, there are inherent limitations and risks in the information that is available. We are reliant on the information provided to us by our suppliers and industry initiatives such as the CFSI. Our processes are intended to provide reasonable assurance – not absolute certainty- about the identification of processing facilities and the sources of their ores.
